FURTHER PARTICULARS FOR THE POST OF DIRECTOR OF MEDICAL EDUCATION

1. BACKGROUND

The Faculty of Medical Sciences (formerly the School of Clinical Medicine and Research) has been a clinical school for over forty years but was upgraded to a full faculty, admitting its first cohort of students in September 2008.

The clinical faculty includes staff members in a range of disciplines including General Medicine, Obstetrics & Gynaecology, Paediatrics, Accident & Emergency Medicine, Anaesthesia, Family Medicine, Haematology, Orthopaedics, Pathology, Microbiology, Public Health and the surgical specialties. With the upgrade to a full faculty in 2008, additional appointments were made in the Basic Sciences (Anatomy, Physiology, Biochemistry, and Pharmacology). The current Dean of the Faculty is Professor Joseph Branday. Members of the Faculty work closely with the clinical departments of the 600 bed Queen Elizabeth Hospital, the Ministry of Health and other health facilities and agencies in Barbados and the Caribbean and with the other UWI Faculties in Jamaica, Trinidad and the School of Clinical Medicine & Research in the Bahamas.

Academic work within the Faculties of Medical Sciences and the School of Clinical Medicine and Research (Bahamas) is located on four sites, in Jamaica, Trinidad, the Bahamas and Barbados. Staff members have access to colleagues on other campuses, and work closely with them, particularly in the teaching and evaluation of students, and in research. Lecturers in the clinical specialties report to the Dean, through the Deputy Dean, Clinical who is based at the QEIH. In addition to the recent development of the full undergraduate programme, emphasis is being placed on the expansion of postgraduate programmes - most recently in Surgery, Orthopaedics and Public Health. The Faculty now offers graduate programmes at the Diploma, Masters and Doctorate levels in Public Health and a Diploma (distance), Masters and DM in Family Medicine.
2. DEPARTMENTAL INFORMATION

The Medical undergraduate programme and associated academic and support staff is currently organised functionally into Phase 1 (the first three years) and Phase 2 (the last two years, leading to the award of the MB BS). There are eight full-time academic staff in Phase 1 and more than twenty in Phase 2. There are also five academic staff members in the Chronic Disease Research Centre, the Research arm of the Faculty and some seventy-five Associate Lecturers, Senior Lecturers and Adjunct Professors, appointed chiefly from among the Queen Elizabeth Hospital consultant staff.
