INTRODUCTION

The University of the West Indies is an autonomous regional institution supported by and serving fifteen different countries in the West Indies – Anguilla, Antigua & Barbuda, the Bahamas, Barbados, Belize, British Virgin Islands, Cayman Islands, Dominica, Grenada, Jamaica, Montserrat, St. Christopher & Nevis, St. Lucia, St. Vincent & the Grenadines, and the Republic of Trinidad & Tobago.

The University was founded in 1948 at the Mona Campus, as a University College in a special relationship with the University of London, and achieved University status in 1962. The St. Augustine Campus, formerly the Imperial College of Tropical Agriculture, was started in 1960 and the Cave Hill Campus was founded in 1963.

The courses and examinations for general degrees of the University are common to all three Campuses. Of the professional faculties, Agriculture and Engineering are located at St. Augustine, Law at Cave Hill and Medical Sciences at Mona and St. Augustine. Level One of the Law course is offered at all Campuses of the University. By special arrangement, the University of Guyana also offers Level One of the LLB programme to its students, some of whom may be accepted to complete the programme at the University of the West Indies. The final two years of the Clinical Programme in Medical Sciences are offered at Cave Hill and in the Bahamas; and Humanities, the Pure & Applied Sciences and Social Sciences are offered at all three campuses.

The UWI embarked on a new system of governance in 1996, which, inter alia, delegated some of the powers of Senate to three Boards, namely, the Board for Undergraduate Studies, the Board for Graduate Studies and Research and the Board for Non-Campus Countries and Distance Education.

The Board for Undergraduate Studies

The Board for Undergraduate Studies has been mandated to develop and implement the Quality Assurance and Quality Audit system at the UWI. It has adopted “fitness for purpose” as its understanding of quality and it is against this background that the Office of the Board for Undergraduate Studies (OBUS) now conducts periodic reviews of the teaching of the different disciplines. These reviews assess both the provision and the attainment of learning objectives in a selected discipline.

The Quality Audit is specifically a review of the Quality Assurance procedures that are in place to determine whether the procedures are adequate to assure quality, although Quality Audits of other aspects of the University’s work are also carried out. OBUS further supports the professional Departments and Faculties as they prepare for external
accreditation exercises. The Board, which is also central to the monitoring of quality within articulation agreements with other regional Tertiary Level Institutions, is the authority for determining all regulations, rules and procedures relating to undergraduate studies.

The Board for Graduate Studies and Research

The School for Graduate Studies and Research was established in 1996, on the recommendation of the Governance Report that noted that in “the future, a university’s reputation will depend much more on its research and the quality of its graduate school”.

The School is governed by the Board for Graduate Studies and Research (BGS&R) which is co-chaired by the Pro-Vice-Chancellor and Dean, Graduate Studies and Research (located at the Mona Campus) and the Pro-Vice-Chancellor, Research (located on, the St. Augustine Campus). Board policies are implemented at Campus levels by Campus Co-ordinators who are also Board members. The main mandate of the Board is to ensure the development and co-ordination of high quality Postgraduate diplomas Taught Masters and Graduate Research Degrees (MPhil and PhDs) as well as providing support for faculty research. Central objectives include strengthening graduate teaching and research especially in the following eight main areas: Cultural Studies, Health, Social and Economic Studies, Sustainable & Environmental Development, Biotechnology, Information Technology, Education and Tourism & Hospitality Management.

The Board is committed to the development of University-wide programmes which will be accessible to students on all campuses and which would allow for University-wide faculty input. Urgent attention is also being paid to improving the access of nationals in the Non-Campus Countries (NCCs) to graduate education and to ensuring that the research needs of the NCCs are being addressed. To this end, wherever possible, research activities and partnerships will be located in these territories.

The BGS&R collaborates with the Board for Non-Campus Countries and Distance Education in its outreach programmes, inclusive of Internet delivery of graduate courses, and with the Board for Undergraduate Studies in its Quality Assurance Audits.

The Board for Non-Campus Countries and Distance Education

The Board for Non-Campus Countries and Distance Education co-ordinates the University’s outreach throughout the region, in particular those aspects of it that are the responsibility of the Distance Education Centre, the School of Continuing Studies and the Tertiary Level Institutions Unit. Within this framework, the Board has formulated a Strategic Plan for Outreach to the NCCs which aims at addressing all the key issues in the University’s service to that sector and recommends
courses of action that will give the NCCs a more visible role in the University.

Some of the main areas of the Strategic Plan include improving NCC enrolment at both the undergraduate and postgraduate levels; strengthening the relationship between the graduates in the NCCs and the Alumni Association (Guild of Graduates); the appointment of Honorary Associates in the NCCs who would liaise between Faculties and local interests; and the implementation of a Scholars and Artists in Residence programme and Country Conferences which would draw on the resources of the Campuses (namely, Faculty members) to promote social and cultural activities as well as encourage public discourse in the form of lectures and seminars in the NCCs.

Affiliated Institutions

The Finance & General Purposes Committee, at its meeting of February 1, 2002, endorsed the decision of the Board for Undergraduate Studies to approve the Mico College’s application for affiliation. Accordingly, the Mico College appears for the first time in the University’s Directory, listed under Affiliated Institutions. In 2003, Shortwood Teachers’ College applied for and received affiliation status as well.
THE MISSION OF THE UNIVERSITY OF THE WEST INDIES

UWI’s mission is to unlock the West Indian potential for economic and cultural growth by high quality teaching and research aimed at meeting critical regional needs, by providing West Indian society with an active intellectual centre and by linking the West Indian community with distinguished centres of research and teaching in the Caribbean and overseas.

The University of the West Indies recognises that as a regional university supported by the West Indian peoples, and as the sole local organ equipped to meet local requirements and relate its own developmental programmes to them, it should give priority to regional needs.

THE ARMS OF THE UNIVERSITY

(Granted to the University College of the West Indies in 1949)

“Barry wavy of six Argent and Azure an open Book proper bound Gules garnished or on a chief of the third a Lion passant guardant Erminois. For the crest on a wreath of the Colour a Pelican proper”.

Forming the main background of the shield is the sea represented by white and blue (three each) wavy lines on which is the open book; the upper part of the shield, the chief, is red with a Lion to show the connection with the Crown, but the Lion is covered with black spots. This is the Lion borne by H.R.H. Princess Alice, Countess of Athlone, appointed by the King (George VI) to be the first Chancellor, so that this appointment is recorded forever in the Arms of the University.

The crest is the brown Pelican which fishes in its prehistoric fashion along the coasts of all the Caribbean Lands; the pelican is a symbol of care for the young because of the mediaeval, but untrue, belief that it punctures its breast to feed its young on its blood. It is also used as crest by both Corpus Christi Colleges of Oxford and Cambridge.

The motto is: Oriens ex Occidente Lux: A Light Rising from the West.
